

Crafit FIREFLY is formulated 3 part epoxy grout glow-in-the-dark grout material for use in residential and commercial areas, as well as in swimming pools, spas, showers, or water fountains. Crafit Firefly is formulated using a non-radioactive rare-earth element that stores energy during exposure to ordinary light and releases it when the lights go off, providing low-level illumination for up to 8 hours after a fifteen-minute exposure to artificial or natural light. Making it the ideal grout to use on indoor or outdoor surfaces.

Residential and commercial facilities can use the glow-in-the-dark characteristics of Firefly to highlight exit ways and paths to safety in the event of a power outage or fire. During normal lighting conditions, Firefly blends into floors, appearing like ordinary white grout but after the lights go out, it glows in the Marine Green or Cool Blue colors. In pools or spas, can add low-level illumination without the dangers of using electricity and can be used to mark stairs, pool edges, or drop-offs for added safety and also be used as a decorative touch, highlighting mosaic tiles or other designs. It is water based, non-toxic, non-radioactive, and odorless, making it safe for use on all indoor and outdoor applications.

Ideal For Use In:

- ❖ Hospitals and nursing homes
- ❖ Manufacturing facilities
- ❖ Sports stadiums
- ❖ Apartment
- ❖ Schools
- ❖ Hotels
- ❖ Theme parks
- ❖ Theaters

Recommended area:

Commercial area, Residential area.

Coverage :

Refer tile grout coverage chart.

Grouting on :

Ceramic tiles
vitrified tiles
porcelain tiles
mosaic
marbles
granite and stones

Packaging
5.5 kg

Recommended for

CERAMIC
VITRIFIED
STONE
MOSAIC
